### **DETAILED ACTION**

Claims 1-40 are pending in the present application. Claims 1-40 will be examined together. However, several patentably distinct species are recited in the claims. Hence, the following species restriction is required.

#### ***Election/Restrictions***

I. This application contains claims directed to the following patentably distinct species of the claimed invention: a donor tissue listed in the Markush group of claim 10 or claim 37 or a liver tissue in claim 11 or claim 38.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-9, 23-31 and 33-36 are generic.

II. This application contains claims 8 and 25 directed to the following patentably distinct species of the claimed invention: (a) a neonate donor, (b) an infant donor, (c) a child donor, (d) a juvenile donor and (e) an adult donor.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-15 and 23-38 are generic.

Art Unit: 1636

III. This application contains claim 15 directed to the following patentably distinct species of the claimed invention: (a) a hepatic cell lineage, (b) a hematopoietic cell lineage, (c) a stromal cell lineage, and (d) a mesenchymal cell lineage.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-15 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1636

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
